

“Money demands of you the recognition that men must work for their own benefit, not for their own injury - that the common bond among men is not the exchange of suffering, but the exchange of goods”

Why talk about philosophy of “money”?

Most of us today are caught up with money - working for the sake of money while cursing it, or tolerating our monetary status quo, wishing if only we had more.

In an era of global capitalism, we are often frustrated by the increasing gap between the haves and have nots. Here, Dr. Yaron Brook, based on Ayn Rand’s philosophy Objectivism, argues that equal is unfair. The issue is poverty, not the inequality. The criticism of inequality betrays jealousy and a sense of guilt, rather than promoting justice.

In this seminar, Dr. Yaron Brook will discuss the history of money from his philosophical standpoint. We struggle with money today, mainly because we are uncertain about the meaning, mechanism, and morality of money. This is why we need the “philosophy of money” - what it means to make money, have money, and use money. Saving and investment - and the future of money - can be understood better and more deeply in this context.

Ayn Rand (1905-1982)

“I am often asked whether I am primarily a novelist or a philosopher. The answer is: both. In a certain sense, every novelist is a philosopher, because one cannot present a picture of human existence without a philosophical framework. . . . In order to define, explain and present my concept of man, I had to become a” philosopher in the specific meaning of the term.” Ayn Rand, “Preface,” *For the New Intellectual*
